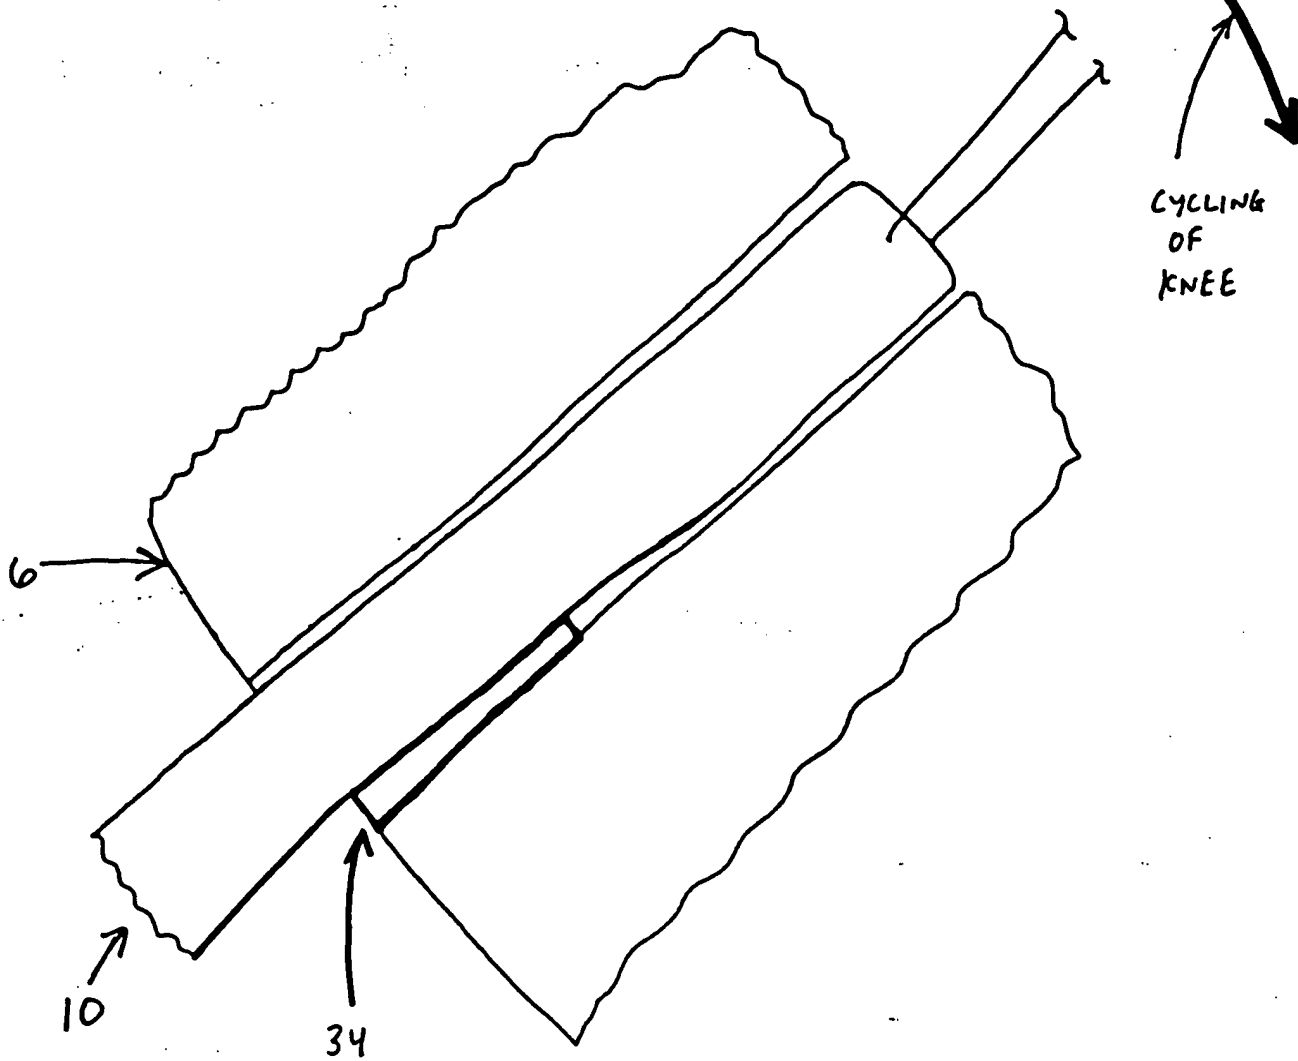

FIG. 9

The diagram illustrates a mechanical model of a knee joint, labeled 10. It features a lever system with several key components and labels:

- 10**: Points to the overall lever assembly.
- 34**: Points to the proximal end of the lever.
- 38**: Points to the distal end of the lever.
- 38'**: Points to a specific point on the distal end of the lever.
- 39**: Points to a pivot point or joint on the lever.
- CYCLING OF KNEE**: A label with arrows indicating the direction of movement.

OPTIONAL: ROUND SURFACES
NEAR MOUTH OF BONE TUNNEL,
TO PROVIDE GENTLE BEARING SURFACES
FOR LIGAMENT

Diagram illustrating a perspective view of a rectangular block with a curved top surface. A dashed circle with arrows indicates a circular feature on the top surface, labeled 39. A curved arrow points to the top edge, labeled 42. A straight arrow points to the side face, labeled 34.

OPTIONAL: ROUND SURFACES NEAR MOUTH OF BONE TUNNEL, TO PROVIDE GENTLE BEARING SURFACES FOR LIGAMENT

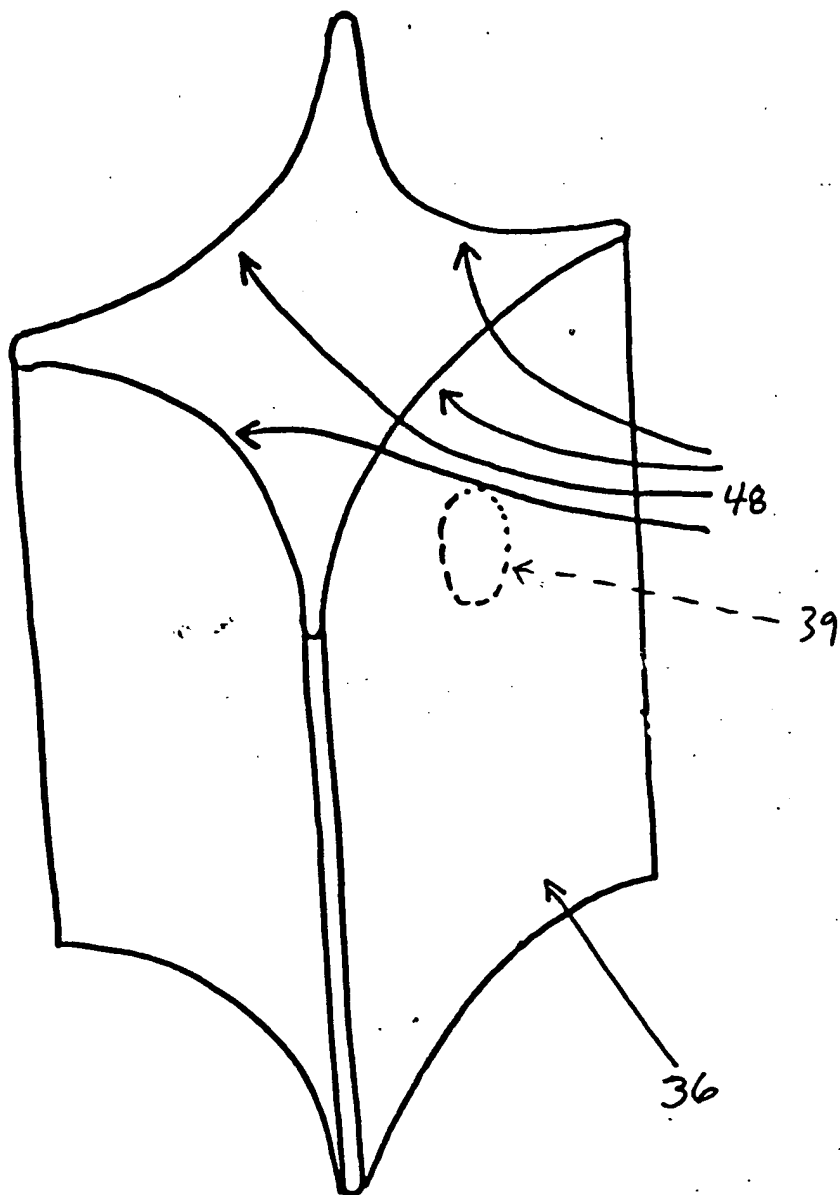

FIG. 15

The figure consists of three vertically stacked cross-sectional diagrams of a tooth with a crown preparation. The diagrams illustrate different stages or components of a crown assembly:

- Top Diagram:** Shows a crown (36) being placed on a prepared tooth (8). The crown has a rectangular core (10) and is surrounded by a ring of small circles (10). Arrows point from the labels 8, 10, and 36 to their respective parts.
- Middle Diagram:** Shows the crown (36) seated on the tooth (8). The crown has a rectangular core (10) and is surrounded by a ring of small circles (10). Arrows point from the labels 8, 10, and 36 to their respective parts.
- Bottom Diagram:** Shows the crown (36) seated on the tooth (8). The crown has a rectangular core (10) and is surrounded by a ring of small circles (10). Arrows point from the labels 8, 10, and 36 to their respective parts.
